

SplitEasy

WireFrames

DESIGN ONBOARDING FOR EXPENSE SHARING APP

INTRODUCTION

Crafting an overview for the creation of SplitEasy wireframes.

Problem Statement

Managing shared expenses with roommates is messy, often leads to confusion, and lacks transparency. There's no simple tool that balances ease, fairness, and trust for everyday shared bills.

DESIGN AN APP'S ONBOARDING WIREFRAMES TO SOLVE THE PROBLEM LISTED ABOVE

Key Challenges

- Difficulty in tracking multiple expenses which needs to be divided among friends
- Inconsistent user experience across various platforms for expense tracking
- Lack of clarity leads to awkward reminders ,disputes and unpaid dues

User Profiles

Settle Up

Key Features Highlighted in Wifreframes

1. Smart Expense Entry

Add title, amount, receipt image, category, and payer in one go.

2. Flexible Split Logic

Choose equal, custom, or percentage-based splits easily.

3. Visual Dashboard

Clean display of balances: who owes whom, total spent, trends.

4. Instant Reminders and Settlements

One-click reminders, mark paid, and UPI settle support.

5. Private Group Access

Secure invite-only rooms with role-based access.

6. History & Recurring Expenses

View past expenses and set monthly recurring bills

Wireframes

ONBOARDING

- **1. Onboarding Screen**
Users land on this page with brief about the app in images with logo and tagline
- **Wireframe:** CTA to get started
- **Problem Solved:** Introduces the app's purpose to user

CREATE GROUP

- **2. Invite System**
Users join via invites , ensuring exclusivity and security by limiting new users to trusted contact
- **Wireframe:** User interface to as to create an expense group
- **Problem Solved :** Enables adding roommates with ease

3. Add Expense

Users can add expense amount with detailed description and category

- **Wireframe:** Expense entry form
- **Problem Solved:** Facilitates records of shared costs

ADD EXPENSE

SPLIT AND SETTLE

4:40

< splitEase

Settle up with roommates

Choose split logic to get started

Brianna
owes \$8.40

Remind

Jessie
owes \$9.35

Remind

You
owes \$775 by Alex

Settle Up

Settle Up

4. Split and Settle

Users can choose whom to send reminder to settle the dues with settle up button

- **Wireframe:** Screen showing how to split costs between roommates
- **Problem Solved:** Clarifies balances and simplifies payment

5. Visual Dashboard

A dashboard shows total worth categorised dues, and recent transactions

- **Wireframe:** Total dues, per roommate due
- **Problem Solved:** View past expenses and set monthly recurring bills (e.g. rent, WiFi).

6. History and Recurring Expense

Users can get the past details of transactions

- **Wireframe:** Displays a monthly breakdown of past expenses along with clearly marked recurring payments. Includes icons, dates, and amounts in a scrollable list.
- **Problem Solved:** Keeps a clear track of past payments and enables users to track past costs

Conclusion

SplitEase was designed to address everyday frustrations roommates face while managing shared expenses — from trust issues and manual tracking to unclear splits. By focusing on intuitive UX, smart logic, and transparency, the product simplifies money matters in shared living situations.

Impact

If implemented, SplitEase aims to:

-  Increase bill payment completion rate by **30%**
-  Reduce roommate disputes/confusion by **40%**
-  Save users an average of **20 minutes per week** on manual expense tracking

What I Learned

Applied **product thinking** to break down a daily problem

Practiced **user journey mapping**, **competitive research**, and **feature prioritization**

Learned the importance of small UX details that drive **trust and adoption**
