Key Takeaways from competitors

- **Engagement:** Multi select text prompts in-place of text boxes
- **User Experience:** Seamless interfaces encourage more reviews.
- **Verification:** Verified order badges enhance review authenticity.
- **Incentives:** Discounts, rewards, and loyalty points incentivize users to leave detailed feedback

New Ideas that can be implemented

Personal Touch: Humanize the experience with real voices and stories from chefs and delivery personnel, enhancing customer connection and trust.

Mandatory Review After N Orders: Introduce a pop-up prompting users to leave a text review after N orders from the same restaurant, with N defaulting to 10.

Add on: Allow restaurants to lower this count for a fee!
